Pertinent Prior Art

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

US 2002/0172492 discloses photodefinable silsesquioxane compositions and method of forming optical waveguides using the compositions, wherein the composition may include a photobase generator, for example 4-(ortho-nitrophenyl)dihydropyridines. The methods comprise exposing the composition to actinic radiation so as to render the exposed areas less soluble than the unexposed areas.

US 5,292,620 discloses a method of making an optical waveguide comprising the steps of exposing to light a region of a substantially dry photohardenable film adhered to a support, then laminating a substantially first dry photohardenable layer which is adhered to a support to one side of the film, removing the support, then laminating a second substantially dry photohardenable layer which is adhered to a support to the other side of the film, and hardening the layers and the film.

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance:

In a process of producing a polymer optical waveguide comprising the steps of forming an undercladding layer on a substrate, forming a photosensitive resin composition layer containing a 1,4-dihydropyridine derivative and a resin on the undercladding layer, irradiating a region of the photosensitive resin composition layer corresponding to a core portion pattern with UV light through a mask to form UV light-

exposed areas and UV light-unexposed areas on the photosensitive resin composition layer, a step of heating the UV light-exposed areas of the photosensitive resin composition layer, and a step of forming an overcladding layer on the photosensitive resin composition layer after heating, the prior art does not teach or suggest the process wherein the heating step further comprises heating the UV light-unexposed areas of the photosensitive resin composition layer.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
